Hi, I am applying for the role of Software Development Engineer (SDE), Frontend Developer, and Backend Developer.

EDUCATION

Madan Mohan Malviya University of Technology

Bachelor of Technology in **Computer Science and Engineering**(CGPA of 7.12)

Gorakhpur, UP

Dec 2020 – Aug 2024

WORK EXPERIENCE

Teaching Assistant

Sep 2022 – Jan 2023

Coding Ninjas (Remote)-Link

- Mentored **450+** students in **DSA** and **OOPs** using C++, achieving an average student rating of **4.8/5** for clarity and support.
- Reviewed and optimized **100+** C++ assignments, focusing on logic, performance, and clean, maintainable code.
- Developed reusable C++ templates and snippets for solving standard DSA problems, enabling faster debugging and improved student code efficiency.
- Contributed to refining course content and assignment quality, leading to smoother learning experiences and higher engagement.

PROJECTS

Urban Bazaar | MongoDB, Express.js, React, Node.js | [Link](#) | [Code](#)

Feb 2025 – Ongoing

- Developed a full-featured eCommerce platform using MongoDB, Express.js, React.js, and Node.js (MERN Stack) with real-time product browsing, cart management functionalities.
- Designed and optimized the product search and filtering functionality, allowing users to quickly find products based on categories and price ranges.
- Implemented advanced features like filter by category and price, search functionality, user roles (Admin/User), and built a fully responsive website for seamless experience across all devices.

Coin Tracker | MongoDB, Express.js, React, Node.js | [Link](#) | [Code](#)

Oct 2024 – Jan 2025

- Built a responsive full-stack application called CoinTracker using the MERN stack to track user income, expenses, and calculate the net balance in real-time.
- Designed and implemented secure user authentication with JWT and bcrypt, ensuring safe login and data access.
- Developed dynamic analytics dashboard with React to visualize financial trends, spending habits, and net wealth changes over time.
- Integrated CRUD functionality for income and expense entries, with form validation and error handling for seamless user experience.
- Used MongoDB to store and structure financial data by user, ensuring scalability and clean data access patterns.

Sorting Visualizer | HTML, CSS, JavaScript | [Link](#) | [Code](#)

Nov 2022 – Jan 2023

- Developed an interactive sorting visualizer from scratch using vanilla JavaScript, enabling users to observe the inner workings of sorting algorithms in real-time.
- Integrated real-time controls for customizing array size, sorting speed, and algorithm selection, enabling users to experiment with sorting algorithms in an interactive learning environment.”

ACADEMIC ACHIEVEMENTS

- Solved **1200+** algorithmic problems across platforms such as GeeksforGeeks and LeetCode, demonstrating strong problem-solving and coding proficiency.
- Secured a global rank of 2,451 out of 17,080 participants in LeetCode Biweekly Contest 93.
- Resolved over **450+** student queries related to Data Structures and Algorithms, maintaining an average rating of **4.78/5**, reflecting strong technical expertise and effective mentoring skills.
- Secured a global rank of 2,700 and a college rank of 30th, with an overall coding score of **2000+** on GeeksforGeeks, showcasing strong competitive programming skills.

CERTIFICATIONS

- Coding Ninjas Data Structures and Algorithms Certification.-[Link](#)
- HackerRank Problem Solving (Intermediate) Certification.-[Link](#)
- HackerRank SQL (Basic) Certification.-[Link](#)

TECHNICAL SKILLS

Programming Languages: C, C++, HTML, CSS, JavaScript

Technologies/Frameworks: React.js, Node.js, Express.js, MongoDB, Mongoose, NoSql, MongoDB Compass, MongoDB Atlas, Sql

Development Tools: VSCode, Sublime Text, Git, GitHub, Postman, Render

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming

CODING PROFILES

LeetCode GeeksForGeeks HackerRank
